Victor Hugo's Prophecy

"A day will come when the only battlefield will be the market open to commerce, and the mind opening to science. When that day comes, all battles and bombs, shells will be replaced by words, and the language of nations, by arbitration. A sovereign sentence, which will be to Europe what the law of God is to England, the diet to Germany, the legislative assembly to France. A day will come when the sword exhibited in public museums, now just an instrument of torture, now just a thing could have been. A day will come when the sword exhibited in the United States of America, and in the United States of Europe, shall be seen displayed in the hands of men across the ocean, exchanging their products, their industry, their art, their science, their knowledge, proving creation under the eye of the Creator, and, indeed, for the good of all, in the interest of all, the powers—the fruitfulness of man and the power of God."

Mothers can easily know when their children are ill, and when they are not. They lose no time in applying the best of remedies—Mother Graves' Worm-Eater.

Bill—“Bro. Sam, what are you putting in your pockets when you go?”

Sam—“It’s like this, Bill. I’m going to paint my fence, and it says on the bill, ‘Paint fence, one cent, plus three or more cents.’ And that’s what I’m doing.”

There is a vertical window and drum at the centre of the locomotive; the window is for the driver, however, for viewing. Ordinarily four locomotives will be required to pull a single train, but the engine will be at the forward part pulling, and the eastern pair guiding the train. With this arrangement, it is possible to couple six locomotives. Power.

The engine is propelled by means of a rack rail while towing and a pinion wheel which runs on a track.

The power is supplied by a motor.

The engine is supplied with steam.

Irrigation Association Exhibition

A item of particular interest to in tending exhibitors at the forthcoming exhibition of soil products to be held by the Western Canada Irrigation Association at Brandon, November 23 and 24, is the announcement that it is necessary that the Canadian Pacific Railway has agreed to carry all exhibits to that exhibition by freight free between the dates of November 10 and 22 inclusive. Exhibits which exhibitors wish to be returned to point of shipment at the close of the exhibition do not have to pay shipping or freight charges but would ship via railcar W2882, which provides for the free return to original shipping point within ten days after the close of the exhibition, on all exhibits for agricultural fairs or expositions. Agents at all stations will be advised to accept shipments on these bases from points in the Irrigation block, Lethbridge district, and the Medicine Hat district, the Okanagan Valley, Kamloops, Arrow Lakes, and Kootenay districts of British Columbia.

Judicial Sale of Farm Property

PURSUANT to the Order Nisi and the final order for sale in S. C. 6053, J. D. C. there will be offered for sale, with the appurtenances of the Minister of the Supreme Court of Alberta, the lands and premises situated in front of the Wilton Hotel, in the town of Claresholm, in the Province of Alberta, at two o'clock in the afternoon, on Saturday, the 9th day of October, A. D. 1915, the following lands and premises, namely, the north west quarter of Section 28, Township 11, Range 28, West of the Fourth Meridian, excepting therefrom 200 acres, more or less, for roadway, the land herein comprised containing 157.99 more or less, as more particularly described in Certificate of Title R.Z.235, together with all buildings and erections thereon, subject to the reservations and conditions contained in the grant from the Crown or the existing certificate of title.

The Vendor is informed that there are the following improvements on this land: one log house 14x17, shingled, in fair state of repair. The land is fenced with one and three-quarter miles of strand wire fencing supported by post poles. About thirty acres of this land are now under cultivation, the soil is a dark chocolate brown. The property is well located being twelve miles from Claresholm and ten miles from Westhouse siding on the C. P. R.

The property will be subject to a reservation which has been made by the Court. The purchase is at the time of the sale to be made in full payment of the purchase money to the vendor or her solicitor, and the remainder of the purchase money is to be paid into Court to the credit of this action as follows: fifteen per cent of the purchase price in ninety days from the date of sale, without interest. Twenty five per cent of the purchase price in one year from the date of sale, with interest at eight per cent per annum. The remaining twenty five per cent of the purchase money to be paid in four equal annual instalments from the date of sale at such rate as to bear interest at the rate of eight per cent per annum. Twenty five per cent of the purchase price in three years from the date of sale with interest at eight per cent per annum.

In all respects the terms of sale are different from those of the Master of the Court of this Honourable Court. Further particulars can be had from the Auctioneer or from Longfellow, McLaws & Company, Solicitors for the Plaintiff, Clarence Block, Calgary, Alberta.

Dated at Calgary, Alberta this 10th day of September, A. D. 1915.

L. G. SHORTREED, Clerk of the Court
Approved: L. F. COOPER

PUBLIC SCHOOL NOTES

The High School students are busy preparing for their commencement exercises on Friday night.

On Monday the High School and grade VIII nominated their candidates for the literary society. The election which was held on Tuesday was conducted according to parliamentary rules, with Percy Cochran as returning officer and Mable Fraser as poll clerk. The election was so keenly contested that the returning officer was obliged to call in the casting vote, for want of a president and secretary treasurer. Ward Clark and Miss Irene Walker being ties for president. Miss Walker was elected by the casting vote. For secretary treasurer Carl Edmund and Miss Lillian Sollberg were tied and returning officer Cochran decided against the favor of the ladies, and great applause.

The following are the officers elected:

President, Irene Walker; vice-president, Alfred Edmund; sec treasurer, Lillian Sollberg; executive committee, Dorothy McNeichol, Hazel Hutton, Norah Holmes and Arthur Baig.

The High School has decided to enter the High School debating league again this year.

Don't Miss the Opening
Gala Grand March

Music by C. R. Newton
of Macleod

Refreshments. Tickets \$1.

Miss Dorothy McNeichol is to be congratulated on winning in the Provincial competition the Grand Gold Medal given by the W. C. T. U. convention which was held at Medicine Hat. Candidates who were eligible included Carl Edmund, Ward Clark and Ward McNeichol. Among Miss McNeichol's closest competitors were Alfred Edmund and Wifred Huig, who are also to be congratulated for the manner in which they acquitted themselves before such a large audience.

Miss McNeichol has consented to give the reading at the commencement exercises on Friday night which won the medal.

The programmes for the commencement exercises are arranged as suitable souvenirs with the name of the school, the names of the trustees and staff on the outside and the names of the successful candidates on the inside of the folder.

Three programmes may be purchased at the school on Friday evening by those wishing them, for ten cents each.

Be up to date and learn the High School yell.

and gray.

Here we come, a boom boy

It's the C. H. S., get out of the way.

THREE MILK HINTS.

How Cleanliness, Economy, Health, May Be Purchased.

In the interests of cleanliness, economy and health it is of the utmost importance to know how to take proper care of your milk. Milk is a vehicle of food because so easily contaminated. Merely to make sure that the milk is clean is not enough. There are many ways in which it can be rendered unfit for use after it has been pasteurized.

Before removing the cap from a bottle of milk that can be washed and carefully wiped with a clean cloth. The cap should be removed with a sharp-pointed instrument without piercing the contents. It may be easily removed with a knife covered, and the milk should be kept in the original bottle until it is used. If the milk is to be stored, it must not be replaced, but instead an inverted glass may be put over the top.

The bottle when not in use should, of course, always be left in a reticule or bag when you go to market, or carried from it into another vessel should not be poured back again, having a strong odor, especially during the hot weather, very easily impart their disagreeable taste to the milk which is covered. This is an additional reason for always keeping milk in a covered receptacle.

The bottle when not in use should,

The Kaiser had always paid close attention to his appearance and gave his friends the impression that he was a great soldier, and a great and courageous man, and that some of his paintings deserved to hang in the Louvre. He was, however, not a great general, nor was he the intellectual attachment of the Tsar, who has called himself the "Tsar of the Russias." He was narrow in his sympathies, the Russian Emperor is a wonderfully well-read man, and a good general, but in a love of Indian history.

The Tzarina, though adored for her beauty, was not a good wife, as much a mystery as her husband. She has been described as an Empress who, though she had no military or political power, might have been carried out of her castle, as a religious exile, though she was a good Christian, a false one. In the company of her children she is revealed as an affectionate mother, but when she comes from the nursery she seems to hold all her real qualities. Once the Empress was seen to be carrying a bunch of violets in her bosom, and the flowers were the blood heat. She replied, "A posy will cool and stand. Poetry, calm the soul and make it strong."

When You Travel.

Don't wait for me to tell you that a few minutes before it is time for the train to start, before you find out the time for starting, arrive at your destination, you will be late for connection. Other passengers wish to take the same train and must buy tickets. And the arrival and departure of the price of your ticket goes to the ticket seller. The price is settled by the managers and directors of the road. If the passenger does not want to contribute to them and stay at home till the price is satisfied? or pay it and keep still—Exchange.

Hannibals.

Advancing civilization is fast diminishing the number of Americans continent. There are said to be twelve species and thirteen varieties. While the poison of this snake is usually fatal to man, it never attempts to strike unless it is molested.

Azalea's Face.

"I'm afraid," said the patient wife, "that you will be the fate of Abel," asked the Azalea, "what does that mean?" asked the astonished husband. "Well," she replied, "Abel was killed by a club, and your club will be the death of you if you don't come home often."

Identifying Her.

"Brown, do you know the lady across the street?" said Smith. "Let me see," replied Azalea, rapidly, "she is tall, slender, brown hair, blue eyes, white dress, my daughter's hat, my mother-in-law's parasol. Why, yes! That's our cook!"—Lester Home Journal.

In Society.

Little Edith, whose parents were of the Four Hundred, was being brought up to attend church regularly Sunday evenings, and to go to the opera whenever possible. Edith felt no inclination to follow her regular customs, in fact she inwardly rebelled against it.

"I don't like it. I just can't feel the least bit like going to church this morning. Why can't we just send out cards?"—Lippincott.

Strassburg Cathedral's Clock.

The clock in Strassburg cathedral is two or three times higher than the nine feet of its tower, its frame is adorned with rather dim decorations and cut up into various motifs, crannies, recesses, and intermissions whose performances have given the clock its worldwide fame.

Foxes and Friends.

When two men are extremely polite to each other it is a sign that they don't like each other. When they say "Hello, you ugly old fool" when they say "Hello, yourself, you porch climbing old horse thief?" they are good friends. —Chestnut Enquirer.

The Caucus.

"'Philly has a new head,'" "There is something out there which with reason could give that idiot a swelled nose,'" "What went that he?" "The real good punching"—Baltimore American.

It is reported by a famous entomologist that a species of white ant attacked the country home of an East Indian farmer, and in a short time ate away the floor and boards of the house. These ants are known to the entomologists, have no eyes, can live only in darkness, and their food is wood. The entomologist also said that in many respects they resemble bees.

Find Exports.

With oil to burn—Now dry your condition hot sweating! Here you are lying in bed with your hat and shoes on. Don't tell me you don't have worse for drink! Husband—Not a bad dear. You know I have been talking to walking in my sleep, and I thought I'd go to bed prepared.—Illustrated Blits.

Gallery Gods.

The occupants of the gallery have received many interesting and valuable gifts from the circumstance that the exhibits of that were formerly embellished with mythological deities surrounded by a sea of azur to represent the sky. The patrons of the gallery were consequently "among the gods."

All in the Bill.

"I have sent for you," said the man of affairs, "and I have sent for you again, and I am sending you again. There's a leak somewhere and a lot of gas going to waste." "No sir," replied the gas company's inspector meditatively. "Maybe there's a leak, but there ain't any gas going to waste—you'll find it in the bill."—Milwaukee Journal.

Fame of Varennes.

The little French town of Varennes is mentioned as the scene of one of the most remarkable events in history. It was there in the summer of 1701, that Louis XVI and Marie Antoinette were stopped in their attempt to flight from France. From there they were carried back to Paris and the scaffold.

A Healthy Heart.

Albert Alton, Germany's greatest authority on heart diseases and the hygiene of the heart, says exercise is healthy after a strong but not excessive exertion, ought to return to its normal number of beats within fifteen minutes after the exercise ends. If it takes much longer than overexertion is apt to set in.

Sign Training.

The recent trip around the world up to date is held by J. H. Morris. Commissioned by the American Gas Association to inspect gas heating systems after a long tour, he found that there were 31 days, 21 hours and 55 minutes. The trip was 20,380 miles on a similar trip, 30 days, 10 hours and 42 minutes. Jaeger Schmidt, in 1911—New York American.

Uncertain.

"Better stop the car," said the owner. "There are three women crossing the street." "I think I can dodge through," suggested the chauffeur.

"Not so wings. One of them will fly forward, another back and the third probably will go up in the air,"—Philadelphia Post.

The Real Thing.

"Tristan is wonderfully good off his wife," she says a natural colorist.

"Why does he think so?"

"Not so wings. She can fasten her waist up the back."

"Yes?"

"And that she always sits on a chair when she puts on her best dress."—Critic Paul Draper.

Silk Women Were a Gas.

While the silk women of the world may have had a sort of enthusiasm unequalled in the history of the world, this has given an utter indifference to everything not related to the silk business. A direct consequence of this is that "Silicon is a gas" disengaged his chemical instructor and was one of the first to blow his military career to pieces. Whistler said himself, if silicon had not been a gas he might have become a major general. But the fates were against it.

The Howards.

The Howards are known to be the greatest "strikers" for genealogists because of the nobles tracing their descent back to almost the dawn of time. Even in the United States, it is the Howards who are the most numerous. And the Howard family of Norfolk represents the oldest family in the world. According to the most trustworthy authorities, the Howards are of Saxon origin, the name in those days being Howard. As far back as 1066 there is no record of the family.

Louisa Gluck.

OPTIMISM.

Optimism is a belief in a great power underlying the world for good, absolutely certain to fulfill itself somewhere, somehow. That must have been what God saw when he looked upon the world and called it "good."—Philip Brooks.

Announcement!

I wish to announce to the Public that I have purchased

the Meat Market formerly owned by D. P. Williams and after remodeling and repainting have opened up the

CLARESHOLM MEAT MARKET

GREAT IMPORTANCE OF COAL IN SUCCESSFUL PROSECUTION OF WAR

DAVID LLOYD GEORGE MAKES STIRRING APPEAL

In Addressing the Coal Miners, Urging a Greater Production of Coal, he Pointed out that it is the British Miner Helping the British Sailor, that is a Big Factor in the War

Mr. David Lloyd George has made

many important and eloquent speeches

but this one is particularly notable. There

are some people who can see nothing

but the black menace in the sky,

and others who are more forward-looking

in their view of the situation.

Coal is everything for us. One

million tons are needed by Ger-

many every day.

Parties are disappeared for the

time being. The war is won,

the optimists and pessimists—the

Blue Sky School and the Grey Sky

Boys.

In my opinion the sky is mortified.

The events in the east mean that a

large part of the struggle will be

over the water.

Victory means the fate of freedom

for ages to come. Freedom implies

the right for others to live free.

That is that fair!

After praising the miners, the work-

ers, the sailors, the minister of munitions

went on to say:

We are in a great crisis. The de-

mand for coal is greater than ever.

This demand is due to the fact

that in times of peace coal is the

most important factor in the eco-

nomy of the country. It flows blood

which courses through the veins of

the nation, the arteries of which are

settled coal. In peace and in war

King Coal is the paramount lord of

industries, of consumption and of utility.

It is our real industrial coun-

cile, our chief asset and raw ma-

terial. We pay no gold, we

do not export, we do not even

except that they are black, and not

in gold.

We bring meat and bread to us

from the country. It goes out its

own way to get white coal.

In war it lives for us and

dies for us. It makes us strong.

It feeds and carries for us. It makes

the material and the machinery which

it creates.

It feeds, it molds, it fills the

weapons of war. Steam, smoke and

fire, smoke, steam, smoke, smoke, coal.

Cannon, men, steel, shells are made

with coal. The explosion inside

them is coal, and their coal carries

them into the battle to help our

men.

Coal is everywhere for us, and we

want it to win victory. Coal is

the most terrible of enemies, and

the most potent ally we have.

It is the German coal, in cooperation with the Prussian

engineers—without which we

were beaten, repudiated, and

weakened at the disposal of

their enemies.

You, and when you find the Ger-

man flag banished from the face

of the earth, the British sailor helping the British soldier;

I have stood on Beachy Head. It

is a fine sight in days of war. You

will rarely see such a sight as

the German fleet, and the

armada of ships that were

driven into the bay by the

British gunners.

They will stand there, and

BUTTER WRAPPERS

Must Be Printed or Branded
According to New Dairy Act

Our facilities for the printing of Butter Wrappers are equal to any found in the province. In prices, considering the quality, we are the lowest. Unless the cheaper grades are desired our prices are always for wrappers made of the best grade vegetable parchment paper, printed with Special Brine Proof, Non-poisonous Butter Wrapper Ink. We can supply the cheaper and imitation grades but we do not recommend them because they do not give the best satisfaction.

CANADIAN RAILS IN UNITED STATES

United States Manufacturers Resist
Entry of Canadian Rail Mills in
American Markets

During recent years huge quantities of railway materials have been imported from United States into Canada to assist in the construction of the vast railway enterprises of this country. The reverse has been true. Railway supplies across the line from United States has ceased temporarily, owing to the general business depression, there is no doubt that in normal times Canadians will continue to buy great quantities of materials of this nature from United States.

Canadian Mills

Up to the present time Canadian rail mills have been able to sell all their capacity on Canadian orders, but since the temporary cessation of activity in Canada they have lost so much business that if they had to depend on the Canadian demand they would be compelled to close down. During, in some cases, go into liquidation. The alert and energetic managers of these Canadian mills saw an opportunity of securing business, albeit at low prices, in United States, and for a time ago the steel mill at Saginaw, Michigan, was successful fully on a bid for a large American railroad. Since then they have secured additional business in United States, and other Canadian mills have followed suit.

"Give and Take"

"The Manufacturers' News," of Chicago, states that to this business recently stated that recognition has followed the recent action of the Illinois Central Railroad because it placed an order for 1,000 tons of rails with the Algoma Steel Company of Canada. The order was for open hearth rails and the price was \$27 a ton delivered at Chicago. This was \$3 a ton cheaper than prices usually quoted by American mills on the same rails.

"However, freight do the railroads of the United States receive upon manufacture of rails made in Canada? If all the rails bought their rails in Canada because they could obtain them at \$3 a ton cheaper what would become of our working men, dealers and manufacturers?

"And what would become of our railroads?"

Some Canadians in the past have complained about the "Made-in-Canada" movement, and particularly about the nationalization which encourages the national manufacturing industry. This does well to reflect on the attitude of the people of the United States with respect to the purchase of rails from Canadian manufacturers. There must be a certain amount of pride taken in matters of trade. It Canada is to be preferred to purchasing huge quantities of manufactured goods from United States, the people of United States, particularly the manufacturers, must be prepared to allow Canadian manufacturers roads to be sold in United States. Where Canadian firms can compete in favorable terms.

An American Protest

The Wall Street Journal, probably the leading financial journal in United States, has recently published the following recent sales in addition to the Illinois Central order: Pere Marquette, 3,500 tons; New York Central, 2,000 tons; Hocking Valley, 1,000 tons; Toledo Terminal, 500 tons; Northern Ohio Trunk, 500 tons; Mississippi River, 500 tons; and "Made-in-Canada" roads," says the Journal, "which have been submitted by the Government, are prohibited from buying their rails from a foreign maker unless the Canadian roads are taken up. As this very rarely occurs, the Canadian roads have very few orders of the kind." To refute this statement it is only necessary to consult the Customs returns for the year ending March 31, 1914, when Canadian purchases of rails from the United States were reported to have been \$1,490,156. During the ten months of the present year, when our mills had little to do, we purchased \$67,056 worth of rails from the United States. When the News and Journal recall the past heavy purchases of Canada in the railroads, surely they can regard the present limited purchases of the United States in Canada without envy.

Who are the people that buy the products of your labor, and that keep you employed and prosperous? Are they not Canadians? Do you turn over goods "Made-in-Canada" but never get paid for them? Do you care for your own prosperity dependent?

Keep Canadian money at home where you can share in the good business it will create. Buy goods "Made in Canada."

COMMUNITY BUILDING

Money Sent Away From Your Town
Will Not Help Your District

Many country newspapers in the United States and Canada are devoting considerable space lately to articles dealing with the value of the money sent away from their own shopping centre and district. "Country Life in Canada," for June, has a lengthy article on "Community Construction," from which we quote only a few paragraphs:

What The Town Means

What then, friends, does the little old town mean to all of us. It is the social center of our community. More than that it is the educational, political, and commercial center of our community. Can you imagine, for example, a vast agricultural territory like Saskatchewan—tear off some town means for all of us. It is a "living" town, a community center for the surrounding country. What would happen to a devastated small town in such a great territory? What would happen to the local school? And what would happen to the medical fabric of the people after—and were the earthquakes to spread indefinitely in its effects, would not the whole of Western Canada suffer irreparable loss?

Causes and Effect

There is a reason for this. We must have a cause to obtain the reaction of an effect. We must look at the question of buying and selling in terms of exchange. That is, we can tell you that the mail man can do a thousand things, but there are thousands of communities on this continent systematically robbing themselves: communities who, with wide open eyes, are doing nothing to control social and commercial life inside a local sense. These communities are the "earthquake" already outlined, and their effect may be more slow but is nevertheless equally disastrous. Do you want proofs? Well, consider the records show that a large U. S. mail order house did a business of \$101,000 in 1913, and paid dividends of approximately \$21,000.00. Had any mail order house in this country been returned to one of the communities who helped to build that vast turnover—these immense annual dividends? True, it is the goods but remember that the earnings are not made by the individuals who write the orders. But what about the dollars? They had gone forever—paid away by that corporation in factories, sources, and supplies of raw material, and in research funds and overheads. The mail order house is robbing itself to support the far off city—with no compensating circulation of currency.

UNDER-HAND FIGHTING

University Writers' Criticisms of "Made-in-Canada" is Superficial

"Show me a man who puts up a 'Made-in-Canada' placard and I will show you a man who hopes to increase his own private and personal profit at your expense or mine, out of the movement."

The above extract is taken from an article signed "S. L. C." occupying an entire page of a semi-monthly paper which appeared in the April issue of the "University Magazine," a review which is published in Montreal and circulated chiefly among university students.

Throughout Canada, at the present time, there are thousands of "Made-in-Canada" placards displayed in the most important manufacturing wholesale establishments and on the products of our leading manufacturers whose reputations are national, and in many cases, international. The "Made-in-Canada" appeal. It is quite true, however, that some individuals, trade journals and advertisements are intended to promote the sale of Canadian goods and, consequently, to yield legitimate profits to those who make them. It is quite true, however, that goods in this and others to whom they can be sold at cost or, better still, at a loss. Are we to assume that "Made-in-Germany" or "Made-in-Austria" goods are not good? Not at all. On the contrary, we are told, that goods should be sold at cost or, better still, at a loss. Admitting that manufacturers and dealers who advocate the "Made-in-Canada" policy have to derive personal benefit from it, while no reasonable person would deny that, it is also true that they do so at the expense of others, or even at a loss.

Admitting that manufacturers and dealers who advocate the "Made-in-Canada" policy have to derive personal benefit from it, while no reasonable person would deny that, it is also true that they do so at the expense of others, or even at a loss.
